

Knuffi®

**Warning and Protective
Bumper Guards**

INFINITE SAFETY

Infinite Safety

This is our promise to you

Made in Germany

Market leader for warning and protective bumper guards

As market leader for warning and protective bumper guards, SHG-PUR Profile makes the world safer. Our brand is Knuffi® and Infinite Safety is our promise. Our high-quality products protect people and machines. This is our task and we take it very seriously. We are the first to recognize new market requirements and convince with perfect products. We offer the right protective for every danger zone. The range is continuously expanded to meet the growing demands of our customers around the world. Every product is developed and tested in Germany. So you can always rely on the highest quality Made in Germany.

We protect man and machines

Knuffi® warning and protective bumper guards absorb even the hardest of impacts and effectively prevent injuries and damage of property. That means: down-times due to injuries or high repair costs are effectively avoided. The eye-catching signal colours help to identify sources of danger at edges, protrusions and obstacles. Knuffi® thus offers the highest level of protection against accidents in the company.

Knuffi® warning and protective bumper guards are temperature-resistant from -40 ° C to 100 ° C as well as moisture-resistant and can therefore be used in a variety of ways, both indoors and outdoors: for example on internal transport routes, on machines, walls and passageways, on shelves, gates and many more.

Revolutionary manufacturing process

Due to the revolutionary manufacturing process, Knuffi® warning and protective bumper guards are very flexible, absorb impact forces and allow easy installation even on uneven objects. Another advantage is the protective film, which protects the bumpers against paint abrasion under heavy use. The secret lies in the structure of the Knuffi® bodies: the core made of polyurethane foam is wrapped in a PU film that is firmly foamed during production. The counter-printing on the inside ensures that the warning marking remains intact for a long time. For easy installation, there is a light- and age-resistant high-performance adhesive on the inside. Knuffi® thus sets new standards in terms of cost-effectiveness through excellent quality and durability.

Only Knuffi® offers Infinite Safety

Our product range includes solutions for surfaces, corners, edges and pipes as well as customised accessories. Available in various colours and with special finishes, Knuffi® warning and protective bumper guards can be used indoors and outdoors. Standard lengths are available in 1-metre pieces and 5-metre rolls. On request, lengths can also be individually cut or supplied as rolls up to 50 running metres.

Special product features

Various product Types are available with special features.

Knuffi® Frost: **Ideal for frosty conditions**

Attachment at up to -10 °C.

Knuffi® Magnetic: When protection needs to be mobile

The magnetic strip allows quick and easy application and removal.

Knuffi® Removable: **Reuse made easy**

A reusable adhesive strip increases economy and sustainability.

Knuffi® Soft: The soft protection for hard cases

40 % softer than the standard profile - with 100 % safety.

Knuffi® PRe: **Better for nature**

Developed for more sustainability.
